Lenny/Kevin

Following up from yesterday's meeting regarding getting additional resources to create the sample ballot pages for our VIG's. Has any headway been made with this issue? We are currently at a critical point where every minute jeopardizes our ability to mail the VIG on time. We are in the final stages of ballot proofing and we can't afford to have any time lapse to get these additional files created. Our vendor needs an expected delivery schedule so they can plan and prepare their production process.
