Hi all,

Since last Thursday counties have forced a match on another 2,634 additional voter pairs. That's 46,295 total since the beginning of the year!

That said there are still over 20k remaining potential matches identified (with our 4 match sets below) for counties for review. As Counties prepare to send VBM ballots to voters it is strongly recommended to review these matches prior to extracting VBM mailing lists to avoid sending matching voters duplicate ballots. If you have already extracted your mailing lists take what steps are possible to align VBM mailing to accommodate for matches determined prior to mailing.

The below chart shows the counts of matches identified today with the four criteria sets we are using to find additional matches not identified in VoteCal. This shows which ones are newly identified this week vs. those that were provided last Thursday or in prior weeks.

Potential Match Voter Records Identified

Newly Identified: 1836, 44, 79, 259
Previously Provided: 5733, 3370, 5107, 4008

Legend:
- Probabalistic Name and DOB
- Same Name Address
- Swapped Names
- Twins
- MatchType

The County request:

1. Please review these potential matches and "force a match" on those you are confident are the same voter, and complete any resulting Merge Voter Determine Survivor (MVDS) messages. Please skip over those you believe are different voters (likely twins given the match criteria), record these non-matches and send them my way.
2. Please respond to let me know if you have been able to keep up with weekly email requests on this topic and/or if you have any questions.
   o If your county has kept up with all prior weekly email requests you may limit your attention to the "Newly identified" voter record pairs and we'll assume that all the previously provided pairs have been determined to not match. If your county has not keep up with all prior weekly emails on this topic please work all "Previously provided" and "Newly identified" voter record pairs.

1

See the below table for an updated breakdown by county of current matches found that are provided for your review.

County	Newly Identified	Previously Provided	Total	Matches found as a percentage of March Primary Active Registration

Subject: RE: 2020 Statewide Potential duplicate voter -(Twins, Swapped Names, Same Name Address, Probabilistic Name DOB)

Hi all,

I am happy to report that since last Thursday counties have forced a match on another 3,468 additional voter pairs. Keep up the good work counties!
That said there are still over 21k remaining potential matches identified (with our 4 match sets below) across the state that are attached for counties for review. As Counties prepare to send VBM ballots to voters it is strongly recommended to review these matches prior to extracting VBM mailing lists so as to avoid sending voters duplicate ballots.

The below chart shows the counts of matches identified with the four criteria sets we are using to find additional matches not identified in VoteCal, and shows which ones are newly identified this week vs. those that were provided last Thursday or in prior weeks.
